JERSON Q. CONMIGO

Senior Front-End Enginner / Tech Lead (Front-End Focused)
jerson.conmigo@gmail.com | 0927 484 4711 | https://www.linkedin.com/in/jerson-conmigo/ | https://jersrej.github.io/

PROFESSIONAL SUMMARY

Senior Front-End Engineer specializing in ReactJS and TypeScript, building scalable, high-performance web applications with a strong focus on Core Web Vitals, code splitting, lazy loading, and WCAG-compliant accessibility. Proven track record modernizing SaaS platforms and driving front-end architecture decisions.

CORE TECHNICAL SKILLS

- Front-End (Core) – ReactJS, Next.js (App Router), TypeScript, JavaScript, TailwindCSS, shadcn/ui, CSS/SCSS, Responsive & Accessible UI, Component architecture
- State / Data / APIs – REST APIs, GraphQL (Client), Redux, TanStack Query, Swagger (OpenAPI), Orval, React Hook Form, Zod
- Auth & Architecture – Okta OIDC (Authorization Code + PKCE), RBAC, Secure Session Management, Backend-for-Frontend (BFF), SPA, Monorepo
- Backend & Platforms (Supporting) – NestJS (hands-on), Node.JS (supporting), TypeORM (exposure), MySQL
- Cloud & DevOps – AWS (EC2, S3), Azure, Azure Pipelines, CI/CD (GitHub Actions, Bitbucket Pipelines), PM2
- Tooling & Practices – Git (GitHub, GitLab, Bitbucket), Vite, Vitest, Playwright, JIRA, Confluence, Trello, Scrum / Kanban, Code Reviews
- Performance & Accessibility – Code Splitting, Lazy Loading, Lighthouse Audits, WCAG 2.1, Semantic HTML, ARIA

PROFESSIONAL EXPERIENCE

- Stratpoint Global Outsourcing, Inc.
  Senior Software Engineer | May 2026 – Present
  - BBSDT – Broadband Self-Service Platform for one of the country's leading telecom companies
    - Architected the Next.js (App Router) and TypeScript frontend with a Backend-for-Frontend (BFF) pattern, keeping tokens and API calls on the server
    - Implemented enterprise SSO with Okta OIDC (Authorization Code + PKCE) and a granular RBAC system with a centralized permission registry
    - Replaced an in-memory session store with stateless, encrypted, httpOnly cookies and consolidated three auth cookies into a single secure token
    - Strengthened session security with token-expiry-based lifetimes, idle detection, automatic sign-out, and single active session detection
    - Established the project foundation, form/validation standards (React Hook Form, Zod), and reusable UI components such as a configurable data table
    - Write unit tests with Vitest, contribute to and review NestJS services, and align API contracts with business analysts and the backend team

- Putti (via Deployed Philippines Inc.)
  Full Stack Developer | Dec 2024 – Aug 2025
  - XPO Group – Event Management Platform
    - Contributed primarily to the front-end redevelopment of XPO Group's internal systems into XPO showtime, a modern event management platform, with supporting backend work.
    - Provided backend support using NestJS, assisted in API implementation and service-layer logic
    - Developed responsive, accessible front-end features using ReactJS, TypeScript, and TailwindCSS
    - Helped replace a legacy PHP system with a modern Node.JS/NestJS architecture.
    - Established reusable front-end components to improve development velocity and consistency
    - Implemented performance optimizations including code splitting, lazy loading, and component memoization, improving application responsiveness
  - OnShout – Digital Gifting Platform
    - Developed front-end features supporting wish-lists, group contributions, and digital gift-card redemption, with supporting backend contributions.
    - Worked within a monorepo setup while focusing on front-end architecture and UI implementation.
    - Conducted front-end code reviews, reinforcing best practices and maintainable TypeScript patterns.
    - Ensured accessible UI patterns using semantic HTML and keyboard navigation

- Applicable Limited (via Deployed Philippines Inc.)
  Front End Developer | Feb 25, 2021 – Dec 2024

- Followed client specs and technical guidelines from PLDs
- Allocated time effectively to meet deadlines and priorities
- Submitted weekly reports and worked closely with team leads
- Maintained adaptability and a positive team mindset
  - Beyond Strategy – SaaS Business Platform
    - Worked as a core front-end contributor on a large-scale SaaS product with a React + C#.NET architecture.
    - Refactored and optimized UI components, introducing lazy loading and bundle optimizations to enhance application performance.
    - Led the migration from Create React App to Vite, improving build speed and developer experience.
    - Collaborated closely with backend architects and Azure hosting teams during releases.
    - Introduced performance improvements such as bundle optimization and lazy loading, contributing to smoother user experience
  - Other Key Projects
    - Auto Mossa – Built reusable UI components and integrated GraphQL APIs for an international automotive ordering system.
    - Gleeson & Cox – Maintained and enhanced a mission-critical Transport Management System using Ember.js.
    - Twiikflow – Led front-end redevelopment from a legacy PHP system to React, improving usability and deployment stability.

- No Standing Digital
  Lead Front End Developer (Remote Work – Contractor) | June 2020 – Feb 19, 2021
  - Designed and structured responsive web pages
  - Developed UI components focused on usability and aesthetics
  - Optimized code for mobile devices, speed, and scalability
  - Maintained design consistency and reusability across projects
  - Setup CI/CD pipelines for Front end deployment (AWS)
    - Polln – Digital Healthcare Platform
      - Led front-end development for three production applications (Patient, Doctor, Admin).
      - Translated Figma designs into scalable, responsive React applications.
      - Monitored and improved application performance through GraphQL caching strategies, efficient rendering, and performance profiling
      - Designed front-end architecture to support long-term growth and feature expansion.
      - Built CI/CD pipelines and managed deployments across Dev, QA, Staging, and Production.
      - Worked directly with founders on technical decisions and product direction.
      - Applied accessibility best practices aligned with WCAG to improve usability across devices

- Quanta Digital Philippines
  Position: Front End Developer (Consultant – Part Time) | January 2020 – Oct 2020 (10 months)
  - Created UX/UI roadmap and implemented technical solutions
  - Built scalable frontend components and digital ads
  - Conducted accessibility reviews and cross-device testing
  - Handled client-side + basic server-side architecture
  - Maintained databases and handled basic deployments
  - Wrote documentation and conducted debugging/testing

- Realista (via SHORE Solutions Inc.)
  Lead Front End Developer | July 2018 – December 2019 (1 year and 5 months)
  - Implemented front-end coding visuals to attain client's design and perspective.
  - Ensured high quality user experience through UI improvements and improved website functionalities
  - Optimized website applications and web speed
  - Implemented best SEO practices.
    - Realista – Real Estate Web Platform
      - Led front-end implementation for a real estate web platform.
      - Converted designs into responsive, production-ready interfaces.
      - Integrated maps, search features, and SEO best practices.

- Lazada E-Services Philippines, Inc.
  Manager, Product (Front End) | September 2015 – July 2018 (3 years and 10 months)
  - Coordinated campaign checklists with regional teams and helped build and maintain landing pages across devices
  - Ensured accurate campaign execution and QA alignment
  - Delegated front-end work and collaborated with cross-functional teams

- Used MySQL for backend data validation
- Tested features pre-release and handled bug reports

Associate, Technology | March 2015 – September 2015 (6 months)

- Created and coded landing pages (from scratch) for campaigns including, but not limited to, the upload of banners on the website and coordinating with merchandisers on page layouts.
- Tested apps for any new releases, debugged existing codes
- Managed manual data pull requests by Marketing & Sales teams using MySQL queries

- Lamido E-Services Philippines, Inc.
  Product Management Executive | October 2014 – March 2015 (5 months)
  - Created campaign pages and debugged code
  - Coordinated with other ventures for campaign execution
  - Managed regional QA checklists and release testing

- Lazada Thailand
  Regional CRM Analyst / Web Developer | March 2014 – October 2014 (7 months)
  - As Regional CRM analyst:
    - Handled newsletter for Lazada Philippines and ensured that newsletter are sent depending on segments.
    - Worked closely with category managers to ensures that SKUs are well-stocked and managed product features.
  - As Web Developer:
    - Created an automated engine for newsletter and re designed newsletter's template for web and mobile version.
    - Debugged and tested existing codes.

- Lazada E-Services Philippines, Inc.
  Senior Web Developer / CMS Associate | September 2013 – March 2014 (6 months)
  Junior Web Developer / CMS Associate | May 18, 2012 – September 2013 (1 year and 6 months)

- Spark Marketing and Research Services, Inc.
  Junior Programmer / IT Support | November 2011 – March 2012 (4 months)

EDUCATION

♦	College:	Technological Institute of the Philippines, 1338 Arlegui St., Quiapo, Manila Bachelor of Science in Computer Engineer	(June 2006 – Oct. 2011)
♦	Secondary:	La Immaculada Concepcion School, Pasig City	(2002 – 2006)
♦	Elementary:	La Immaculada Concepcion School, Pasig City	(1998 – 2002)
		Pasig Catholic College, Pasig City	(1997 – 1998)
